

AUTOTURN On-Demand Training

Master vehicle turning analysis with expert training

AutoTURN is the industry-leading solution for vehicle turning analysis. Our on-demand training program is designed to help engineers, planners, designers, and others alike maximize the software's capabilities to ensure efficiency and compliance in their road and site design projects.

On-demand training overview

Whether you're just getting started with AutoTURN or aiming to become your team's go-to expert, we've got you covered. Our on-demand training covers basic to advanced features in AutoTURN and AutoTURN Pro, supporting users at every skill level.

Format Online course platform

Schedule At your own pace

Duration 2 hours of video content

Pricing Model Yearly subscription per user

Delivery Self-paced and independent

Engagement Pre-recorded training videos and quizzes

Skill level Beginner to advanced

Recording Pre-recorded videos

Key Benefits

- Certificate of completion offered.
- Cost-effective for individual skill development.
- Comprehensive content built by product experts.
- No pre-requisites needed.

Why should I go with on-demand training

Flexible Learning	Learn at your own pace, making it easy to integrate professional development into your busy life.
Applied Skill Building	Get hands-on with simulations and swept path analysis tools that you can immediately apply to your daily work and projects.
Credibility	Boost your professional credentials and receive a certificate of completion to validate your expertise in AutoTURN.

AutoTURN on-demand training FAQ

For organizations wanting a quick overview of AutoTURN, whether for new users or as a refresher, our on-demand training provides a standardized curriculum that fits your schedule. This online, self-paced course covers everything from basic to advanced features in AutoTURN and AutoTURN Pro.

Who should attend? Ideal for designers, engineers-in-training, engineers, technologists, and technicians who are new to AutoTURN, as well as existing users seeking formal training or a refresher.

What's included?

- 12-month unlimited access to training materials starting from your enrollment date.
- 46 lessons consisting of in-depth pre-recorded videos and quizzes on essential and advanced AutoTURN tools.
- Certificate of completion to validate your AutoTURN expertise.

Where is it held? On-demand training is held asynchronously on an online course platform.

Am I able to ask questions during the on-demand training? Yes, if you have any questions about how to use the software, please reach out to Technical Support at support@transoftsolutions.com

What topics are covered?

The online curriculum covers the following topics:

- Overview of core and advanced tools.
- How to simulate vehicle turns using core tools (SmartPath tools: Arc Path, Corner Path, Place Simulation).
- How to change properties to control display settings.
- How to create new vehicles from manufacturer specifications in 2D and 3D.
- How to simulate oversized vehicles with manual steering.
- How to analyze ground and vertical clearances in 2D and 3D.
- How to use IntelliPath® to automate vehicle turn simulations.
- How to analyze sightlines and stopping sight distances in 2D and 3D.
- How to inspect existing simulations to identify commonly overlooked issues.
- How to simulate different non-motorized vehicles.
- How to analyze clearances for different components of non-motorized vehicles.
- How to pull reports for turning, proximity, steering, and speed profiles.
- How to produce reports like profile and cross-sections and animations of 3D analysis.
